To whom it may concern,

Due to our recent evaluation of the fixed load permitting process we will request schematics for all self-propelled equipment permits. Single trip and annual permits will need to provide the schematics before a fixed load permit will be issued. The schematics must include axle spacings, axle weights, gross weight, and length; including any front or rear overhang. Failure to provide the requested information could delay the release of the permit or a denial of the permit. If you have any questions or concerns regarding this policy, please contact the Oversize & Overweight Permit Department at (615) 741-3821. We appreciate your cooperation as we strive to better serve specialized freight carriers and the motoring public.

Sincerely,

Oversize & Overweight Permit Department
